

we save. You ought to look at some of the thing because this is the day in which we live in. You push a button for example and whats in there comes out immediately. You research all of the statutes in a matter of minutes rather than days and weeks, and hours, and years. We ought to have the county and the city hooked into this system, the university and the normal schools and this state is number one, number one in the field of computers as far as the state government is concerned. We have the model system of this country. We don't even know it. Just go back a couple of years and see how we did it then and how we do it now. Nobody ever asks how do we do it, we don't know, you are not interested. It takes some people who are interested to move these things. If I have any good here in this body, and there is some question about that, I am a capitilist of movement. I'm not backward but forward. Sometimes I go backward but it is against my better will and judgment.

PRESIDENT: The Chair recognizes Senator Keyes.

KEYES: Mr. President, that should be 7 members, I understood someone to say 12, but that should be 7. I listened this morning to a lot of people talking about taking politics out of it and probably politics should be taken out of it, that is one of the finest things that we could do that we could have like this body is a nonpolitical group. I realize that the Supreme Court Judges are appointed by the Governor but they are also approved by the Legislature. So if we want to do something that is right, lets have these men select 4 of their members and have them serve on this commission. All of now all that this commission does under the leadership of the Governor would be to select an administrator and a Director. Lets keep it out of the hands of the politics
